

VAC CHECKER®

by DD|COMPOUND

VACUUM INFUSION

AT ITS BEST

Instant and precise check of vacuum with the Vac Checker® enables parts of the highest quality.

Only a vacuum tied setup with absolute vacuum enables parts of the highest quality made by vacuum infusion. Vac Checker® by DD-Compound is a digital pressure gauge that measures the absolute pressure and displays digitally the immediate change in pressure. The maintenance-free pressure sensor delivers exact and reliable measurements in the range of 1100 to 0.00 mbar and a resolution of 0.01 mbar. So signs of leaks or weaknesses can be spotted quickly and easily. This ability to detect changes in pressure saves time and money during the infusion setup. Vac Checker® displays also the evaporation temperature of water.

Advantages of Vac Checker®

- Measurement range from 1100 to 0.00 mbar
- Resolution: 0.01 mbar
- Parameter: mmHg, Torr, mbar, hPa, micron, inH₂O, inHg, Pa
- Display of the evaporation temperature of water
- Resistant to water and dirt (IP42)
- Connectors for tubes with an internal diameter of 6mm, 8mm and 10mm
